Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-24 are presented for examination on the merits.

Election/Restrictions

Applicants election with traverse filed November 2, 2009, is acknowledged and the arguments are deemed persuasive. Thus, the restriction requirement has been removed.

Information Disclosure Statement

The information disclosure statements (IDSs) submitted on July 30, 2008 and February 21, 2006, were received. The submissions are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 1651

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-24 are rejected under 35 U.S.C. 102(a, e) as being anticipated by Von Eichel-Streiber et al (US2003/0103987), published June 5, 2003, or anticipated by Dang et al (USP 7344710), both cited on enclosed Form and PTO-1449 and Form PTO-892, respectively.

Claims are drawn to method and kit for treating tumors in mammals comprising administering a bacterium, *Clostridium novyi* or *Clostridium sordellii* to the mammal and agent to slow growth of tumor.

Von Eichel-Streiber et al teach that the bacterium can produce a toxin which is lethal to tumor or a cancer. Note page 6, col. 2, paragraph 0072, lines 1-50, and see the abstract, as well as page 1, col. 1, lines 1-20. The toxins are produced in culture containers that contain the bacterium (e.g. kit). The inhibitor enzyme and toxic agents produced by the bacteria are inherent to the reference because Von Eichel-Streiber et al teach that these agents are produced.

Dang et al. teach method and kit, therefore, for treating tumors in a mammal, comprising administering to the mammal spores of a toxin-defective, bacterium (anaerobic) and administering an anti-tumor agent to slow the tumor growth. Note col. 2, lines 1-25 and col. 4, lines 35-67, also see the entire abstract.

The claims are identical to each of these cited disclosures and are, therefore, considered to be anticipated by the teachings of the references.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
